The MAILING DATE of this communication app	pears on the cover sheet with the	correspondence addre	ss
THE REPLY FILED 16 June 2003 FAILS TO PLACE T Therefore; further action by the applicant is required to a final rejection under 37 CFR 1.113 may only be either: (condition for allowance; (2) a timely filed Notice of Appe Examination (RCE) in compliance with 37 CFR 1.114.	avoid abandonment of this application and abandonment of this application are applicated an application application and application are application as a second application and application are application as a second application ap	ation. A proper reply t h places the application	to a on in
PERIOD FOR F	REPLY [check either a) or b)]		
a) The period for reply expires 3 months from the mailing da			
b) The period for reply expires on: (1) the mailing date of this no event, however, will the statutory period for reply expire ONLY CHECK THIS BOX WHEN THE FIRST REPLY WA 706.07(f).	later than SIX MONTHS from the mailing	g date of the final rejection	
Extensions of time may be obtained under 37 CFR 1.136(a). The fee have been filed is the date for purposes of determining the period fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of (2) as set forth in (b) above, if checked. Any reply received by the Of timely filed, may reduce any earned patent term adjustment. See 37	of extension and the corresponding amount of the shortened statutory period for reply fice later than three months after the main	ount of the fee. The approp originally set in the final Of	oriate extension fice action; or
1. A Notice of Appeal was filed on Appellant 37 CFR 1.192(a), or any extension thereof (37 CF			
2. The proposed amendment(s) will not be entered to	pecause:		
(a) 🛛 they raise new issues that would require furth	ner consideration and/or search (see NOTE below);	
(b) they raise the issue of new matter (see Note	below);		
(c) ☐ they are not deemed to place the application issues for appeal; and/or	in better form for appeal by mate	erially reducing or simp	olifying the
(d) they present additional claims without cance	ling a corresponding number of f	inally rejected claims.	
NOTE: See Continuation Sheet.	•		
3. Applicant's reply has overcome the following rejection	ction(s):		
4. Newly proposed or amended claim(s) would canceling the non-allowable claim(s).	d be allowable if submitted in a se	eparate, timely filed an	nendment
5. The a) affidavit, b) exhibit, or c) request for application in condition for allowance because:	or reconsideration has been cons	idered but does NOT p	place the
6. The affidavit or exhibit will NOT be considered be raised by the Examiner in the final rejection.	cause it is not directed SOLELY	to issues which were r	newly
For purposes of Appeal, the proposed amendmen explanation of how the new or amended claims v	nt(s) a) will not be entered or b would be rejected is provided belo) ☐ will be entered and ow or appended.	d an
The status of the claim(s) is (or will be) as follows	:		
Claim(s) allowed:			
Claim(s) objected to:			
Claim(s) rejected: <u>1-17 and 43-46</u> .			
Claim(s) withdrawn from consideration:			
8. The proposed drawing correction filed on is	s a) approved or b) disapp	roved by the Examine	.

10.	•		

Continuation of 2. NOTE: In Paper No. 9 Applicant cancelled Claims 18-42. Applicant has now added claims that were previously cancelled, specifically Claims 35 and 37-42. Appropriate correction is required.

Applicant's amendment to Claim 1, 6 and 11 raises new issue because applicant now clarifies that a semiconductor device is affixed to a book. Prior to this these claims recited the use of a label disposed on a book that contained a record, applicant has now clarified that a semiconductor is affixed to the book, wherein the semiconductor device stores a record.

Furthermore regarding applicant argument regarding Claim 14. Examiner holds that Johnson in view of Sato renders the claimed invention unpatentable. Specifically Sato discloses a bar code that is placed on a book (Sato: Fig 10). The Bar code is used to store information such as title, publisher etc. Johnson discloses an authorization system, which allows a user or potential licensee of a book to make copies if authorized to do so (Johnson: col 10, lines 44-55; col 9, lines 15-67). Examiner holds that one of ordinary skill in the art would store the web address of the authorization system in the bar code disclosed by Sato such that a request to Johnson's authorization system can be made, by using the input obtained from the bar code reader, Master file (Sato: col 9, lines 15-40). Johnson suggests that his system can be run over the Internet therefore these modifications would be readily apparent to one of ordinary skill in the art.
